## VISUAL CLADDING CHOICES

Our cladding choices are exclusively premium, carefully chosen for their outstanding quality, long-term durability, and low maintenance needs.

### THERMO AYOUS

Thermo Ayous is a sustainably sourced, heat-treated hardwood with a smooth, elegant grain. Its enhanced durability and stability make it an ideal low-maintenance choice for modern, natural garden rooms.

### CHARRED SPRUCE

Charred spruce is created using a traditional Japanese method of preserving wood by charring its surface. This process forms a protective layer that enhances the wood's durability and makes it more resistant to decay, insects, and fire.

### WESTERN RED CEDAR

A popular choice for garden rooms thanks to its natural resistance to rot and decay, making it a durable and long-lasting material for use in outdoor applications.

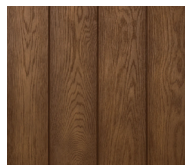

### LIMED OAK

### MILLBOARD®

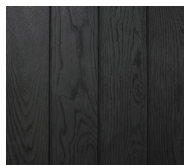

Millboard® cladding replicates the look of natural timber with incredible realism. Made from composite materials, it is UV-resistant, rot-proof, and maintenance-free, ensuring a consistent, long-lasting finish for modern builds.

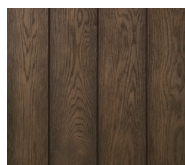

### SALT BLUE

### COPPERED OAK

### BURNT CEDAR

### ANTIQUE OAK

## ELECTRIC PACK
